Summary

Data-driven Supply Chain Business Analyst with 5+ years of experience transforming procurement, logistics, inventory, and ERP data into actionable operational insights. Proven expertise in Power BI, SQL, Excel, and supply chain analytics to improve forecasting accuracy, inventory availability, landed cost visibility, and procurement performance. Experienced in international logistics, supplier management, shipment tracking, and cross-functional collaboration across procurement, finance, sales, and operations teams.

Skills

Analytics: Power BI, Tableau, SQL, Excel, Python
Excel Modeling: Power Query, Power Pivot, PivotTables, Data Modeling, Forecasting
Supply Chain Analytics: Inventory Analysis, Demand Planning, Procurement Analytics, Logistics Reporting, KPI Tracking
ERP Systems: SAP, Microsoft Dynamics, Business Central, ERP Reporting, Data Extraction
Procurement Operations: P2P, RFQ, Strategic Sourcing, Supplier Management, Reconciliation
Logistics: Shipment Tracking, Freight Coordination, Landed Costs, Incoterms, International Logistics
Forecasting: Statistical Models, Predictive Analytics, Inventory Forecasting, Demand Forecasting, Scenario Analysis
Compliance: Trade Compliance, CBSA, HS Codes, Certificates of Origin, Documentation
Financial Analysis: Spend Analysis, Cost Modeling, Budgeting, Margin Analysis, Cost Control
Collaboration: Stakeholder Management, Cross-functional, Sales Support, Communication, Problem Solving

Work Experience

Procurement Buyer Decibel Cannabis Company	Dec 2025 - Present
- Built supplier performance tracking systems in Power BI that automated procurement reporting workflows, reducing manual analysis time by 50% while improving visibility into procurement KPIs, inbound shipments, and inventory. - Maintained 99%+ data accuracy across ERP and inventory records, improving reporting reliability and supporting data-driven purchasing and forecasting decisions. - Engineered complex SQL queries and automated reporting pipelines to consolidate procurement and logistics data from multiple data sources into actionable insights. - Improved inventory availability and maintained 98% production uptime by optimizing purchase planning and improving forecasting for international suppliers with long lead times. - Delivered data-driven inventory and procurement recommendations by analyzing purchasing trends, inbound logistics data, and supplier lead times, improving stock availability while reducing excess inventory carrying costs by 20%. - Increased supplier on-time delivery performance by 30% through vendor scorecards, proactive supplier engagement, and performance-driven relationship management strategies. - Architected a Star Schema procurement data model using Fact and Dimension tables, significantly improving Power BI dashboard performance and enabling self-service supply chain analytics. - Managed the end-to-end Procure-to-Pay (P2P) lifecycle, streamlining PO creation and shipment tracking to achieve a 98% on-time delivery rate and ensuring seamless invoice reconciliation. - Consolidated ERP, supplier, logistics, and inventory datasets into centralized Power BI dashboards, enabling stakeholders to monitor landed costs, inbound shipment performance, and procurement KPIs in real time. - Collaborated with operations and finance teams to reconcile procurement discrepancies, validate shipment documentation, and improve reporting accuracy across purchasing and inventory systems. - Tracked international inbound shipments and supplier deliveries using ERP and logistics data, proactively identifying delays and minimizing supply chain disruptions for production-critical materials.	
Purchaser in Global Procurement Vestas Wind Systems	Nov 2021 - Aug 2023
- Reduced procurement costs by 15% through data-driven supplier evaluations, spend analysis, and strategic sourcing initiatives across global supply chain operations. - Improved inventory planning accuracy and reduced purchasing delays by implementing predictive analytics models for demand forecasting and supplier coordination. - Delivered over \$35M in operational savings by developing Python-based procurement automation tools that streamlined sourcing, purchasing, and KPI reporting using Power BI. - Automated procurement and logistics reporting workflows using Power Query, SharePoint, and SAP integrations, reducing manual effort by 30% and improving data visibility. - Mitigated supply chain disruptions by conducting supplier risk analysis and identifying alternative sourcing strategies to maintain continuity across critical materials. - Streamlined RFQ and quotation comparison processes using automation and analytics tools, reducing procurement cycle times by 40% and accelerating supplier selection. - Negotiated supplier contracts and optimized sourcing strategies to achieve significant cost savings while maintaining compliance with procurement governance standards. - Developed and standardized procurement policies, workflows, and documentation processes, improving operational governance and cross-functional alignment. - Coordinated invoice processing, payment tracking, and procurement expense reconciliation within ERP systems, improving financial visibility and reporting accuracy. - Developed statistical demand forecasting models using procurement and inventory trends, improving planning accuracy and reducing supplier-related purchasing delays across global operations.	
Consultant ECM Purchaser in Global Procurement,Vestas ManpowerGroup Services	Jan 2021 - Nov 2021
- Reduced procurement costs by 10% through data-driven process optimization and improved sourcing efficiency across supply chain operations. - Collaborated with project managers on budgeting, bid evaluations, and procurement planning activities, supporting cost-effective sourcing and project delivery objectives. - Identified savings opportunities exceeding €3M by analyzing supplier pricing, payment terms, and procurement strategies using data-driven financial analysis techniques. - Improved purchasing efficiency by 15% through cross-functional collaboration and deployment of Lean methodologies across procurement and supply chain processes. - Developed cloud-based procurement automation tools that improved team productivity by 30% and accelerated purchasing and approval workflows. - Created Power BI dashboards to monitor procurement KPIs, supplier performance, and purchasing trends, improving decision-making accuracy by 18%. - Integrated SAP ERP tools into procurement workflows, reducing manual processing efforts by 30% while improving procurement data integrity and accessibility. - Managed global sourcing activities to ensure cost-effective procurement, 100% on-time delivery performance, and compliance with quality standards. - Standardized procurement templates, reporting tools, and governance processes, improving compliance adherence and accelerating cross-functional collaboration by 20%.	
Procurement Engineer(Intern) - Global Sourcing Valeo India	Jan 2019 - Jan 2021
- Managed end-to-end RFx processes and strategic sourcing initiatives, achieving 10–15% procurement cost reductions through supplier negotiations and competitive bidding strategies. - Executed digital supplier auctions and e-sourcing initiatives, reducing procurement costs by 8–12% through competitive vendor engagement and market analysis. - Conducted zero-based cost modeling and cost benchmarking analysis using advanced Excel tools, enabling data-driven negotiations that delivered 15% cost savings. - Optimized purchasing and sourcing processes using best-cost country strategies and procurement analytics, reducing overall procurement spend by 10%. - Built interactive procurement dashboards to monitor supplier performance, sourcing KPIs, and purchasing metrics, reducing reporting time by 40%. - Performed cost benchmarking and market pricing analysis across supply chain categories to identify pricing anomalies and improve procurement strategy development. - Implemented RXIL TReDS solutions to improve supplier liquidity, streamline invoice discounting processes, and enhance supplier relationship management. - Conducted supplier risk assessments and integrated sourcing strategies, reducing supply continuity and reduced supplier dependence risks.	

Projects

Inventory Forecasting Model Built machine learning models to forecast inventory needs, optimizing procurement and supply chain operations for improved efficiency and cost savings. (Machine Learning, Procurement, Supply Chain, Forecasting)
Supplier Performance Dashboard Built a Tableau dashboard to visualize supplier performance metrics and procurement KPIs, enabling faster decision-making and reducing reporting time by 40%. (Tableau, Procurement, Supply Chain, Data Visualization)
Supply Chain Logistics Analytics Developed Power BI dashboards integrating ERP, shipment, and supplier data to monitor inbound logistics performance, landed costs, inventory availability, and procurement KPIs across international supply chain operations. (Power BI, Logistics, Procurement, Supply Chain)

Education

Post Grad Diploma in Data Analytics for Business St. Clair College, Canada	GPA: 4.0 / 4.0 Sep 2023 - Apr 2025
Bachelor of Mechanical Engineering St. Joseph's Institute of Technology, India	GPA: 3.7 / 4.0 Jun 2014 - Jun 2018
