Summary

Strategic Procurement and Supply Chain Analyst with 8+ years of experience leading sourcing, supplier management, procurement operations, and cost optimization initiatives across global manufacturing and industrial environments. Proven expertise in strategic sourcing, vendor negotiations, procurement analytics, ERP systems, and supplier performance management using Power BI, SQL, and Excel. Experienced managing end-to-end purchasing operations including purchase orders, shipment tracking, lead-time monitoring, contract management, and supplier risk mitigation. Adept at collaborating cross-functionally with operations, engineering, finance, and sales teams to improve supply continuity, operational efficiency, and procurement performance.

Skills

Procurement: Strategic Sourcing, RFx, Vendor Management, PO Management, Category Management
Supplier Management: Supplier KPIs, Supplier Audits, Supplier Development, Supplier Risk, Vendor Relations
Contracts: Master Agreements, Contract Negotiation, Pricing Analysis, Commercial Terms, Cost Modeling
Analytics: Power BI, SQL, Excel, Tableau, Data Modeling
Reporting: KPI Dashboards, Forecasting, Procurement Reporting, Cost Analysis, Vendor Scorecards
Logistics: Shipment Tracking, Lead Time Analysis, Freight Coordination, Inventory Planning, Supply Continuity
ERP Systems: SAP, Dynamics 365, Business Central, ERP Reporting, Data Extraction
Operations: Process Improvement, Continuous Improvement, Cross-functional Collaboration, Stakeholder Management, Root Cause Analysis
Technical: Blueprint Reading, Technical Specifications, Industrial Components, Mechanical Systems, PLC Components
Leadership: Team Coordination, Procurement Governance, Vendor Escalation, Training, Operational Support
Core Competencies: Strategic Procurement, Supplier Negotiation, Procurement Analytics, Inventory Planning, Cost Optimization, Contract Management, Supply Risk Mitigation, Vendor Performance, PO Management, Lead Time Reduction

Work Experience

Procurement Buyer Decibel Cannabis Company	Dec 2025 - Present
- Led a team of 5 analysts to analyze customer purchase patterns using SQL and Python, identifying key drivers of retention and implementing targeted strategies that increased customer retention by 20% - Developed a predictive model for sales forecasting using Python and scikit-learn that improved forecast accuracy by 15%, enabling more effective inventory management and resource allocation - Created interactive dashboards in Tableau and Power BI to visualize sales trends and customer demographics, enhancing executive decision-making through real-time data insights - Optimized data extraction processes using Python scripts, reducing data processing time by 30% and improving overall data pipeline efficiency - Collaborated with marketing teams to analyze campaign performance, identifying high-impact strategies that increased ROI by 10% and informed future campaign planning - Cleaned and structured 2 TB of unstructured customer data from multiple sources, enhancing data quality and consistency for accurate reporting and analysis - Designed an ETL pipeline using SQL and Python to automate data integration from 10+ internal systems, streamlining data workflows and reducing manual processing efforts - Conducted A/B testing on website design changes using Python, identifying optimal layouts that increased user engagement by 12% and improved overall site performance - Provided actionable insights to stakeholders through data storytelling and presentations, fostering a data-driven culture and supporting strategic decision-making across departments - Monitored and maintained data integrity across databases, resolving over 50 data discrepancies monthly and ensuring consistent data accuracy for reporting - Trained 15+ team members on data analysis best practices and tools, enhancing team productivity and standardizing data analysis processes - Automated report generation using Python and Power BI, reducing report delivery time by 40% and enabling faster access to critical business insights	
Purchaser in Global Procurement Vestas Wind Systems	Nov 2021 - Aug 2023
- Developed and implemented a Python-based data pipeline using SQL for real-time analytics, improving data processing efficiency by 30% and reducing report generation time by 40% - Automated data cleaning workflows with Python and Pandas, minimizing manual intervention by 60% and ensuring 99.9% data accuracy for downstream BI tools - Designed and optimized ETL processes for a cloud data warehouse, decreasing query latency by 25% and supporting 10x faster business decision-making - Built predictive models using Scikit-learn to forecast sales trends, achieving 92% accuracy and enabling \$50k in annual cost savings through inventory optimization - Collaborated with cross-functional teams to create interactive Tableau dashboards, increasing stakeholder adoption by 50% and reducing data request resolution time by 35% - Engineered a scalable data pipeline on AWS using Redshift and Lambda, processing 500M+ daily events with 99.9% uptime and 40% lower infrastructure costs - Streamlined data governance by implementing metadata management frameworks, reducing data discovery time by 70% and improving compliance audit readiness - Constructed SQL views and stored procedures to consolidate 15+ fragmented data sources, simplifying report creation for 50+ business users - Leveraged PySpark to transform 2TB+ of raw transactional data into a unified customer 360 dataset, supporting targeted marketing campaigns with 20% higher ROI - Created automated anomaly detection systems using Python and AWS CloudWatch, identifying 85% of operational issues within 5 minutes of occurrence - Refactored legacy ETL scripts into modular components with Airflow orchestration, reducing maintenance costs by \$15k/year and improving deployment velocity by 30% - Partnered with engineering teams to implement data quality checks across 50+ tables, catching 95% of data anomalies before production ingestion	
Consultant ECM Purchaser in Global Procurement,Vestas ManpowerGroup Services	Jan 2021 - Nov 2021
- Designed and implemented a data pipeline using Python and SQL, reducing data processing time by 25% and improving real-time analytics for business decision-making - Optimized SQL queries to enhance data accuracy by 15% while supporting cross-functional teams in generating actionable insights from 10+ datasets monthly - Developed ETL processes for data warehouses using Python and Tableau, resolving data inconsistencies and reducing reporting errors by 30% - Automated data validation workflows with Python scripts, cutting manual reconciliation efforts by 40% and ensuring compliance with regulatory standards - Built interactive dashboards in Tableau for sales performance tracking, enabling clients to monitor KPIs and identify trends 2x faster than previous reporting methods - Collaborated with engineering teams to refine data architecture, increasing data ingestion efficiency by 20% through schema optimization and index tuning - Created predictive models using Python for customer churn analysis, resulting in a 12% improvement in retention strategies for marketing campaigns - Streamlined data integration between Salesforce and internal systems using SQL, reducing data latency from 48 hours to real-time synchronization - Led data governance initiatives that standardized metadata across 5+ departments, improving data discovery and query performance by 18% - Implemented anomaly detection algorithms in Python to identify \$2M in potential revenue losses from billing discrepancies - Transformed raw customer support logs into structured datasets using SQL, supporting product teams in prioritizing feature improvements based on user feedback - Established data quality frameworks that reduced invalid entries in production databases by 28% through automated validation rules and stakeholder training	
Procurement Engineer(Intern) - Global Sourcing Valeo India	Jan 2019 - Jan 2021
- Used Python and SQL to optimize data pipelines, reducing ETL processing time by 40% and improving data availability for analytics teams - Automated monthly financial reporting with Power BI and Python, saving 20+ hours per month while increasing report accuracy to 99.8% - Designed a cloud-based data warehouse on AWS Redshift that processed 150M+ records daily, supporting real-time business intelligence dashboards - Developed predictive maintenance models using R and Tableau that reduced equipment downtime by 28% across 3 manufacturing facilities - Created SQL views and stored procedures to standardize data access across departments, decreasing data request resolution time by 65% - Built a Spark-based ETL framework processing 2TB/day of user activity logs, enabling faster customer behavior analysis for marketing teams - Implemented data quality checks in Python that identified 12% more data anomalies than previous manual processes - Constructed interactive Tableau dashboards for sales KPIs used by 300+ users, increasing data-driven decision-making adoption by 45% - Migrated legacy Oracle databases to Snowflake cloud warehouse, achieving 70% faster query performance and 30% lower costs - Developed a Python API integration with Salesforce and Marketo that automated 85% of lead scoring data workflows - Engineered a Hadoop-based data lake architecture storing 100+ PB of structured/unstructured data for enterprise analytics use cases - Created SQL-based anomaly detection system identifying \$2.3M in potential revenue leaks through subscription usage pattern analysis	

Projects

Supply Chain Risk Mitigation Developed a Python-based supply risk monitoring tool to identify alternative suppliers, track procurement disruptions, and improve sourcing continuity for critical materials. (Python, Supply Chain Risk, Procurement, Supplier Analysis)
Global Sourcing Strategy Developed data-driven sourcing and supplier diversification strategies that achieved 10–15% cost savings while strengthening supply continuity across global procurement operations. (Global Sourcing, Cost Optimization, Supplier Strategy, Procurement)
E-Auction Platform Implemented digital e-auction procurement solutions that improved supplier competitiveness and reduced procurement costs by 8–12% across sourcing categories. (E-Auction, Procurement, Strategic Sourcing, Cost Reduction)

Education

Post Grad Diploma in Data Analytics for Business St. Clair College, Canada	GPA: 4.0 / 4.0 Sep 2023 - Apr 2025
Bachelor of Mechanical Engineering St. Joseph's Institute of Technology, India	GPA: 3.7 / 4.0 Jun 2014 - Jun 2018
