Summary

Operations and Manufacturing professional with 7+ years of experience coordinating high-volume industrial operations, leading cross-functional teams, managing operational performance, and driving safety, quality, and continuous improvement initiatives. Proven experience providing direction to team members, coordinating daily operational priorities, managing escalations, resolving performance issues, and maintaining compliance with established operational standards. Experienced in manufacturing, equipment operations support, production coordination, KPI monitoring, corrective action management, stakeholder communication, and data-driven performance improvement across global industrial environments.

Skills

Operations & Team Supervision: Team Leadership, Team Coordination, Daily Operations, Shift Coordination, Work Prioritization, Performance Management, Frontline Team Support

Safety & Compliance: Safety Compliance, Operational Standards, Safety Procedures, Risk Management, Corrective Actions, Incident Escalation, Process Controls, Safety Accountability

Equipment & Manufacturing Operations: Manufacturing Operations, Equipment Operations Support, Production Support, Equipment Troubleshooting, Operational Inspections, Maintenance Coordination, Service Continuity, Production Equipment

Shift & Operational Coordination: Shift Briefings, Daily Operational Priorities, Shift Handover, Work Coordination, Operational Scheduling, Multitasking, Issue Escalation, Service Requirements

Performance & Continuous Improvement: Safety KPIs, Service KPIs, Performance Metrics, KPI Monitoring, Root Cause Analysis, Corrective Action Management, Continuous Improvement, Process Standardization

Communication & Stakeholder Management: Team Communication, Safety Discussions, Stakeholder Coordination, Cross-Functional Collaboration, Conflict Resolution, Escalation Management, Team Coaching, Performance Feedback

Systems & Reporting: Power BI, Excel, SAP, Sage ERP, ERP Systems, Operational Reporting, Performance Dashboards

Work Experience

- Category Buyer

Dec 2025 - Present

Decibel Cannabis Company

 - Coordinated cross-functional operational activities with Operations, Quality, Finance, suppliers, and internal stakeholders to maintain production continuity, resolve issues, and meet operational requirements.
 - Monitored operational and supplier performance metrics through Power BI dashboards, identifying service issues, performance gaps, and corrective actions to improve operational reliability.
 - Reduced operational disruption by proactively identifying supply and supplier risks, coordinating corrective actions, and maintaining material availability to support uninterrupted production operations.
 - Improved supplier on-time delivery by 30% through structured performance reviews, issue escalation, corrective action tracking, and continuous improvement initiatives.
 - Managed multiple time-sensitive operational priorities across purchasing, inventory, planning, and production requirements while maintaining accurate ERP records and meeting service expectations.
 - Partnered with Operations and Quality teams to investigate process and supply issues, implement corrective actions, and improve compliance with established operational procedures.
- Purchaser in Global Procurement

Feb 2021 - Aug 2023

Vestas Wind Systems

 - Led and coordinated junior team members across daily operational priorities, supplier escalations, issue resolution, and manufacturing support activities while maintaining performance and service requirements.
 - Coordinated multiple concurrent operational activities across Engineering, Production, Quality, Procurement, and external partners to maintain manufacturing continuity and resolve delivery, quality, and operational issues.
 - Identified and resolved operational risks through performance monitoring, issue escalation, root-cause analysis, and corrective action planning, resolving 95% of identified potential disruptions.
 - Supported high-volume manufacturing operations by coordinating material requirements, production priorities, supplier activities, and internal stakeholders to minimize operational disruptions.
 - Standardized operational procedures, reporting workflows, and governance controls, improving process consistency, documentation, accountability, and compliance with established standards.
 - Developed dashboards to monitor operational KPIs, identify performance gaps, and provide leadership with actionable information for corrective actions and continuous improvement.
 - Acted as a primary escalation point for supplier delivery, quality, and operational issues, coordinating timely resolution across internal teams and external partners.
- Procurement Engineer

Jun 2019 - Jan 2021

Valeo India

 - Supported high-volume manufacturing operations by coordinating suppliers, production requirements, internal stakeholders, and material availability to maintain operational continuity and minimize disruptions.
 - Conducted operational and supplier risk assessments, identified potential disruptions, and coordinated mitigation strategies that improved supply continuity and operational resilience by 20%.
 - Monitored operational and service performance metrics, identified performance gaps, escalated issues, and coordinated corrective actions with internal teams and external partners.
 - Coordinated multiple concurrent manufacturing, supplier development, and operational priorities while maintaining attention to detail, deadlines, documentation, quality requirements, and established procedures.
 - Supported continuous improvement and supplier development initiatives through structured performance monitoring, root-cause analysis, issue resolution, and cross-functional collaboration.
- Junior Engineer

Mar 2017 - Jun 2019

Precirec Engineers

 - Led new product development for industrial machinery, including Automatic Induction Hardening and Wet End equipment, from conceptualization and feasibility through cost analysis, design validation, process development, implementation support, and final product approval.
 - Coordinated production activities and led frontline team members to meet daily operational priorities while maintaining product quality, process requirements, and safety standards.
 - Conducted design and manufacturing feasibility reviews with customers and internal stakeholders, identifying required modifications and coordinating implementation through production.
 - Supported equipment and process troubleshooting by evaluating manufacturing issues, coordinating corrective actions, and implementing process improvements to improve operational performance.
 - Managed vendor master creation, equipment-related information, supplier records, and operational documentation to maintain accurate and reliable production records.
 - Performed maintenance and retrofitting of electric motors, including conversion of electromagnetic braking systems for cranes and escalators to improve equipment reliability and operational performance.
 - Installed, maintained, and troubleshoot centralized lubrication systems to ensure proper lubrication, reduce equipment wear, and support reliable machine operation.

Projects

- Manufacturing Operations & KPI Monitoring

Developed operational dashboards to monitor service performance, production-related metrics, operational trends, and performance gaps, enabling leadership to prioritize corrective actions and improve operational visibility.
(KPI Monitoring, Operational Performance, Performance Metrics, Corrective Actions, Power BI)
- Equipment & Operational Risk Management

Developed a data-driven risk monitoring approach to identify operational and equipment-related risks, prioritize potential disruptions, coordinate mitigation actions, and improve continuity across manufacturing operations.
(Risk Management, Equipment Operations, Operational Continuity, Risk Mitigation, Problem Solving)
- Manufacturing Process Improvement

Standardized recurring manufacturing workflows, operational reporting, and process controls to reduce manual effort, improve data accuracy, strengthen operational visibility, and support consistent execution of established procedures.
(Continuous Improvement, Process Optimization, Process Standardization, Operational Controls, Performance Improvement)

Education

- Post Grad Diploma in Data Analytics for Business

GPA: 4.0 / 4.0

St. Clair College, Canada

Sep 2023 - Apr 2025
- Bachelor of Mechanical Engineering

GPA: 3.7 / 4.0

St. Joseph's Institute of Technology, India

Jun 2014 - Jun 2018
